

Sustainability

AFJ Ltd views sustainability as a core corporate value and fully recognizes our responsibilities towards good environmental stewardship.

We operate our management and professional activities in ways that not only protect and enhance the Earth's natural resources, but offers opportunities for people to realize their potential and improve their quality of life.

In general sustainability, we will:

- Set best practice standards.
- Meet environmental legislation targets at all levels.
- Take account of the impact our decisions will have on future generations.

In corporate responsibility, we will:

- Encourage staff and contractors associated with AFJ Ltd to incorporate an informed approach to sustainability within their work.
- Work in ways that balance social and economic impact.
- Operate in ways that minimize any adverse impact on local communities.
- Deliver an improved quality of life for our clients.

In service delivery, AFJ will:

- Develop sustainable procurement procedures across the entire supply chain.
- Encourage repair, reuse and recycling wherever possible to minimise waste.
- Maximize efficient use of energy and materials.
- Dispose of surplus materials that are not reusable in a responsible manner.
- Create a culture of continual improvement in sustainability performance.
- Develop employees to encourage the promotion of the general principles and procedures of sustainability.
- Set and achieve sustainable development objectives and targets.

Recognize, celebrate and reward achievement in our objective to make all AFJ employees proactive leaders in sustainable improvement throughout our entire business.
